

Ishwar Desai

I'm a Computer Science Engineering student currently pursuing honors in Artificial Intelligence and Machine Learning. I'm passionate about data science and AI, and I'm actively working on projects to build my skills. I enjoy solving complex problems and am excited about the chance to apply my knowledge in a practical internship setting.

EDUCATION

Secondary Education

St. John School

84%

Higher Secondary Education

Janata Vidyalay Yeola

76%

B-Tech

Sanjivani College of Engineering

11/2022 - Present

8.0 CGPA

SKILLS

Programming
Languages: C, C++, Python, HTML5, CSS, Javascript

Data Pre-processing, Data Visualization Plots, Data Mining-K-Means, Hierarchical Clustering

Database : Mysql , PostgreSQL

AI Technologies: ANN, Computer Vision and Image Processing

Development Tools: Jupyter Notebook, Spyder, Google-Co-lab

WORK EXPERIENCE

Hands-on Data Science & AI Experience

Coursework

01/2024 - Present

Developed and implemented data science projects using Python, focusing on real-world problem-solving. Performed data cleaning, manipulation, and visualization with libraries such as Pandas, NumPy, and Matplotlib. Built predictive models using machine learning algorithms, including linear regression, decision trees, and clustering techniques with Scikit-Learn. Conducted exploratory data analysis (EDA) to identify patterns, correlations, and trends in large datasets, extracting actionable insights to drive data-driven decisions. Applied statistical analysis and hypothesis testing to validate findings and enhance business understanding. Gained hands-on experience in artificial intelligence by developing artificial neural networks (ANN) for predictive modeling and classification tasks. Utilized OpenCV for image processing, including object detection, image segmentation, and feature extraction, to tackle computer vision challenges. Worked on AI projects involving neural networks, improving model accuracy and performance through iterative testing and tuning. Collaborated in group projects, simulating real-world team-based data science and AI workflows, fostering teamwork and communication skills. Documented project processes, results, and insights, creating comprehensive reports and visual presentations to effectively communicate findings.

PERSONAL PROJECTS

- InnovAttend - Attendance System (03/2024 - Present)
- Developed an attendance management system that streamlines the attendance process. InnovAttend generates a unique token for 30 seconds, announced by the faculty during class. Students enter the token within the allotted time to mark their attendance. This system enhances security, minimizes proxy attendance, and simplifies attendance tracking for both students and faculty.

SOFT SKILLS

Strong Problem-Solving Abilities

Strategic and Organized Planning

Effective Time Management

Creative Thinking and Innovation

CERTIFICATES

Python for Data Science (12/2022 - 02/2023)

Completed a course on Python for Data Science, learning how to use Python to solve real-world data problems. Developed skills in working with data, including organizing, analyzing, and visualizing it. Gained experience in using Python for tasks like statistical analysis and machine learning to help make informed decisions based on data.
